M Mudassar Hussain

AI/ML Engineer, Deep Learning, Data Science, Generative AI, MLOPs, LLMs & RAG Systems, AI Agents

Bahawalpur, Pakistan

+923051565030 **mudassarjutt65030@gmail.com** **www.linkedin.com/in/m-mudasssar-85** **https://github.com/MudassarGill**

SUMMARY

AI/ML Engineer with 1+ year of experience in designing, developing, and deploying scalable AI solutions across machine learning,deep learning, and Generative AI domains. Strong expertise in Large Language Models (LLMs), RAG systems, and MLOps pipelines. Proven ability to build end-to-end intelligent systems, optimize model performance, and deploy production-ready applications using modern cloud and DevOps practices.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL

AI/ML Expertise: Machine Learning, Deep Learning, Data Science, Computer Vision, Natural Language Processing (NLP), MLOps, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Agentic AI Architectures, AI Agents, Autonomous AI Systems (e.g., AutoGPT, BabyAGI), Reinforcement Learning, Prompt Engineering, LLM Fine-Tuning

Deep Learning Frameworks: TensorFlow, PyTorch, Keras, Hugging Face, Ollama, ONNX, NVIDIA TensorRT, OpenCV, Transformers

Libraries & Tools: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV, NLTK, FastAPI, Flask,Django, Git, Docker, MLflow, DVC, LangChain, LangGraph, PeFT, n8n, LlamaIndex, LangSmith, AutoGen, Pinecone, Qdrant, ChromaDB, OpenAI API, Anthropic Claude API, Gemini API, PySpark, Ray Serve, Kubernetes, GitHub Actions, Nginx

Soft Skills: Leadership, Critical Thinking, Problem Solving, Communication Skills, Team Work

PROFESSIONAL EXPERIENCE

Machine Learning Engineer — ***Dec 2024 – Jan 2026***
Game Range — ***Bahawalpur, Pak***

- Developed and optimized deep learning models using TensorFlow and PyTorch, achieving an 18% gain in accuracy and a 25% reduction in training time.
- Led data preprocessing, EDA, and feature selection for ML workflows, enhancing dataset integrity and increasing overall model performance by 12%
- Built and deployed RAG-based generative AI systems with LangChain and Hugging Face, improving contextual accuracy by 25% and reducing response latency by 20%

Python Developer Intern — ***Oct 2026 – Jan 2026***
DevCastle Bahawalpur — ***Bahawalpur,Pak***

- Worked on backend development using Python and FastAPI, building scalable and efficient RESTful APIs
- Developed real-world projects involving data processing, automation, and API-based systems
- Improved application performance through debugging, optimization, and clean code practices
- Implemented structured development workflows using Git and version control

PROJECTS & PORTFOLIO

NextHire AI — AI-Powered Mock Interview Platform ***FastAPI, PostgreSQL, Groq (LLaMA 3), Docker, AWS EC2, Nginx, JavaScript***

- Built a production-ready AI interview platform simulating real technical interviews
- Implemented Auto Voice Interview Mode (TTS + STT) for hands-free interaction
- Integrated LLM-based evaluation (Groq LLaMA 3) with real-time scoring (correctness, depth, clarity)
- Developed secure authentication system (JWT + bcrypt)
- Deployed on AWS with Docker + CI/CD pipeline (GitHub Actions)
- Enabled dynamic role-based question generation (ML, Backend, DevOps, etc.)

AutoML DataLab — AI-Powered ML Platform ***FastAPI, React, Tailwind CSS, MLflow, Scikit-learn, Docker,JavaScript***

- Developed an end-to-end AutoML system (data upload → preprocessing → training → prediction)Implemented Auto Voice Interview Mode (TTS + STT) for hands-free interaction
- Implemented automated data cleaning (missing values, outliers, duplicates)
- Designed AutoML training pipeline (Logistic Regression & Random Forest)
- Deployed on AWS with Docker + CI/CD pipeline (GitHub Actions)
- Integrated MLflow for experiment tracking and model versioning

AMFiller – Automatic Missing Value ***Python, Pandas, NumPy, Scikit-learn,PyPI***

- Developed a Python library to automatically detect and handle missing values in structured datasets.
- Designed intelligent imputation strategies for both numerical and categorical features to improve data quality
- Built a flexible and user-friendly API enabling seamless integration into machine learning pipelines, reducing manual data cleaning effort.

PreMLCheck – ML Data Analysis Library ***Python, Pandas, NumPy, Scikit-learn,PyPI***

- Developed a Python library that analyzes datasets before model training to detect data quality issues and risks.
- Implemented automated checks for missing values, feature distributions, and potential ML pitfalls.
- Provided actionable insights to improve data quality and reduce model training failures

AutoPX – Automated Text Preprocessing with Explainability ***Python, Pandas, NumPy, Scikit-learn,PyPI,NLP***

- Built an intelligent preprocessing library that automatically transforms raw text into model-ready format.
- Designed adaptive preprocessing pipelines with explainability reports for each transformation step.
- Reduced manual preprocessing effort by dynamically selecting optimal strategies based on input data.

EDUCATION

The Islamia University of Bahawalpur
B.S Artificial Intelligence

CERTIFICATIONS

Advance python programming Course – Navttc
Machine Learning Specialization - deeplearning.ai
